

1.

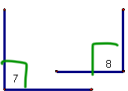

Given:  $\overline{AB} \parallel \overline{CD}$

Conclusion#1:  $\angle 1 \cong \angle 3$  Reason:  $\text{If } \parallel, \text{ alt int } \angle s \cong$

Conclusion#2:  $\overline{BD} = \overline{BD}$  Reason:  $\text{Reflexive}$

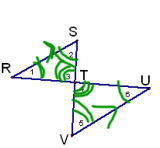

2.

Given:  $\angle 7$  is a right  $\angle$ ,  $\angle 8$  is a right  $\angle$

Conclusion#1:  $\angle 7 \cong \angle 8$  Reason:  $\text{Rt. } \angle s \text{ are } \cong$

3.

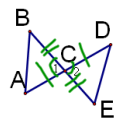

Given:  $\overline{RS} \parallel \overline{UV}$

Conclusion#1:  $\angle 1 \cong \angle 6$  Reason:  $\text{If } \parallel, \text{ alt int } \angle s \cong$

Conclusion#2:  $\angle 2 \cong \angle 5$  Reason:  $\text{"}$

Conclusion#3:  $\angle 3 \cong \angle 4$  Reason:  $\text{Vert. } \angle s \cong$

4.

Given:  $\overline{BE}$  bisects  $\overline{AD}$  and  $\overline{AD}$  bisects  $\overline{BE}$

Conclusion#1: Reason:

Conclusion#2: Reason:

Conclusion#3: Reason:

#1  $AC = CD$  R: def of bis.

#2  $BC = CE$  R: " " "

#3  $\angle 1 \cong \angle 2$  R: Vert  $\angle s \cong$

5.

Given:  $MN \perp MQ$ ,  $PQ \perp MQ$   
 Conclusion#1: \_\_\_\_\_ Reason: def. of  $\perp$  lines  
 Conclusion#2: \_\_\_\_\_ Reason: def. of  $\perp$  lines  
 Conclusion#3: \_\_\_\_\_ Reason: right  $\angle$ s are  $\cong$   
 Conclusion#4: \_\_\_\_\_ Reason: \_\_\_\_\_

#1  $\angle NMO$  is rt  $\angle$   
 #2  $\angle PQO$  is rt  $\angle$   
 #3  $\angle NMO \cong \angle PQO$   
 #4  $\angle 1 \cong \angle 2$  R: Vert  $\angle$ s  $\cong$

6.

Given: K is the midpoint of  $\overline{LJ}$   
 Conclusion#1: \_\_\_\_\_ Reason: \_\_\_\_\_  
 Conclusion#2: \_\_\_\_\_ Reason: \_\_\_\_\_

#1  $LK = JK$  R: def of midpt  
 #2  $LK = LK$  R: Reflexive

9.

Given: Y is the midpoint of  $\overline{XZ}$ ,  $\overline{AY}$  bisects  $\angle XAZ$   
 Conclusion#1: \_\_\_\_\_ Reason: \_\_\_\_\_  
 Conclusion#2: \_\_\_\_\_ Reason: \_\_\_\_\_  
 Conclusion#3: \_\_\_\_\_ Reason: \_\_\_\_\_

#1  $XY = YZ$  R: def of midpt  
 #2  $\angle 3 \cong \angle 4$  R: def of  $\angle$  Bis  
 #3  $YA = YA$  R: Reflexive
